

How to Choose the Best Location for **Fire Points**, **First Aid Box** and **H&S Information Board**

Item	Where Should It Be Placed?	Why This Location Is Good
Fire Extinguishers 	• Near exits and entrances • Close to (but not inside) high-risk areas like machinery, welding, electrical zones • Spread evenly around the workshop	• Easy to grab while escaping • Accessible without entering danger • Covers different workshop zones • Meets fire-safety travel-distance rules
First Aid Kits 	• Near main entrance or supervisor office • Near low-risk areas close to high-risk zones (but not inside hazardous zones) • Places workers pass regularly	• Quick access in an emergency • Avoids placing kits where reaching them is dangerous • Easy for workers to remember and locate

H&S Information Board 	• At main entrance or reception point • Near clock-in area or break room • High-visibility, low-noise location	• All workers see safety info daily • Helps visitors know procedures immediately • Not in a hazardous or distracting area

Types of Fire Extinguishers with Fire Classes

Extinguisher Type	Fire Class	Suitable For	Key Features
Water (Red)	A	Wood, paper, textiles	Not for electrical or oil fires; cools burning material
Foam (Cream)	A, B	Wood, paper, flammable liquids	Can cover liquid surfaces to prevent re-ignition
Dry Powder (Blue)	A, B, C, Electrical	Combustibles, flammable liquids, gases, electrical fires	Multipurpose; leaves residue; versatile
CO ₂ (Black)	B, Electrical	Electrical fires, flammable liquids	Leaves no residue; cools and smothers fire; safe on electronics

Wet Chemical (Yellow)	F or K	Cooking oil/fat fires	Forms a foam layer to extinguish and cool; ideal for kitchens

Important Information for H&S Information Board

Workplace Safety Policies	Brief summary of company safety rules, PPE requirements, and general safety guidelines.
Emergency Contacts	Fire brigade, ambulance, police numbers Internal emergency contacts (H&S officer, first aider, floor warden)
First Aid Information	Location of first aid kits Names and contacts of trained first aiders Procedures for reporting accidents or injuries
Fire Safety Information	Fire evacuation procedures Location of fire extinguishers and fire alarms Evacuation assembly points
Accident Reporting Procedure	Step-by-step instructions on how to report accidents or near misses (forms, reporting channels).
Health & Safety Posters / Notices	Mandatory H&S signage PPE requirements (hard hats, goggles, gloves) Hazard warnings (chemical, electrical, machinery)
Legal Information	Relevant H&S legislation references, workplace safety regulations, or statutory notices required by law.

Training & Safety Updates	Dates of H&S meetings or toolbox talks Latest safety procedures or notices Training opportunities for staff
Emergency Evacuation Map	Floor plan showing exits, escape routes, assembly points, and firefighting equipment locations.
Other Hazard Warnings	Machinery or chemical hazards Noise zones, hot surfaces, high voltage areas \
	Any site-specific risks

Firs Aid Kit Contents

First Aid Kit Item	Quantity (Typical)	Purpose / Use
Adhesive Plasters (band-aids)	20–50	Cover minor cuts, grazes, or blisters to prevent infection
Sterile Gauze Pads / Dressings	5–10	Absorb blood, cover wounds, prevent contamination
Sterile Eye Pads / Eye Dressings	2–4	Protect injured eyes from dust or chemicals
Rolls of Sterile Bandage / Crepe Bandage	2–4	Secure dressings, support sprains or strains, control bleeding
Antiseptic Wipes / Solution	10–20	Clean wounds to prevent infection (alcohol wipes, iodine solution)
Adhesive Tape	1 roll	Secure bandages or dressings in place
Scissors / Blunt-Tip Forceps	1 each	Cut dressings, tape, clothing; remove debris safely
Disposable Gloves	2–6 pairs	Protect both injured person and first aider from infection
Burn Dressing / Burn Gel Sachets	1–2	Provide immediate relief and protection for minor burns
Triangular Bandage / Sling	1–2	Immobilize injured limbs or create arm slings

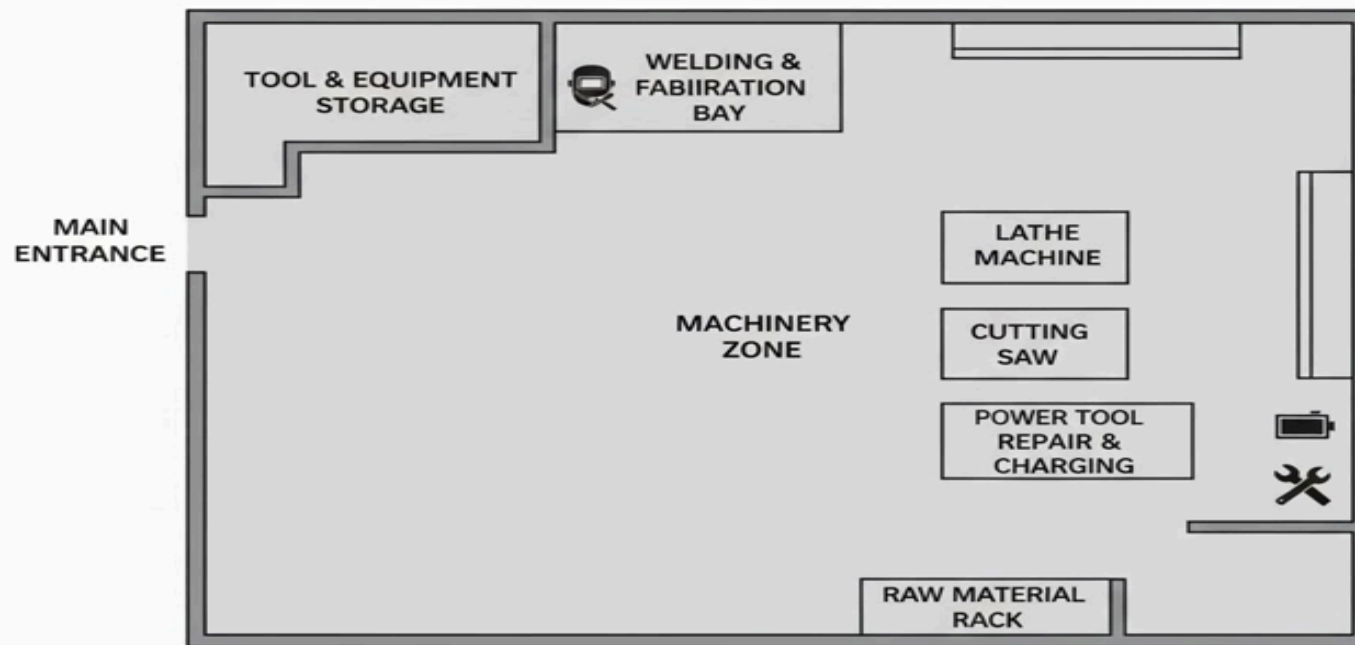

CPR Face Shield / Mask	1	Provide safe mouth-to-mouth resuscitation in emergencies
Instant Cold Pack / Ice Pack	1–2	Reduce swelling, bruising, or pain from sprains and minor injuries
Safety Pins	4–6	Secure bandages or slings
Eye Wash / Saline Solution	1–2 bottles	Flush out chemicals, dust, or foreign objects from eyes
First Aid Manual / Instruction Leaflet	1	Provide guidance on administering first aid correctly
Elastic Bandage / Support Bandage	1–2	Support sprained joints or strains
Alcohol Swabs	10–20	Disinfect skin or clean tools before use
Pain Relief Tablets (optional, per workplace policy)	Few	Provide temporary relief for minor aches or headaches

Exercise 1

STUDENT TASK:

1. Mark locations for Fire Extirishers.
 2. First Aid Kits.
 3. H&S Info Boards.
- Justify your choices.
